wherein the determining is performed in response to receiving a request to perform an operation on a logical volume, wherein the logical volume is created before the request to perform an operation is received,
the first specification is based on an intent for the logical volume and the operation,
searching a plurality of existing storage regions...; and
if no existing storage region is found corresponding to a first needed storage region in the first set of needed storage regions, determining a second specification for a second set of storage regions to be acquired, wherein the second set of storage regions is needed to perform the operation on the logical volume.”

Claims 3-12, 14-17, 19-22, and 24-27 are also allowable for at least the same reason set forth in claims 1, 13, 18, and 23.
